U.S. EXPORTS OF BEEF BREEDING CATTLE,

CALENDAR 1970

USDA inspections for export of beef breeding cattle during 1970 totaled 22,265 head. This was a decrease of 25 percent from the alltime high of 29,669 head exported in 1969. Canada continued to be the most important export market for U.S. beef breeding cattle, taking 9,843 head, an increase of 4 percent above the previous year's total of 9,420 head. Mexico remained the second most important outlet in 1970, taking 4,383 head, a substantial decrease from the 6,268 head taken in 1969. Mexico suffered a severe and prolonged drought during the latter months of 1969 and the first months of 1970, which undoubtedly slowed down the rate of breeding cattle imports.

The decrease in U.S. exports of beef breeding cattle during 1970 is primarily attributed to smaller exports to Mexico and Venezuela. Mexican imports declined 1,885 head. However, the greatest decline in 1970 was in U.S. exports to Venezuela, which were only 515 head, compared with 4,667 in 1969. Exports to Chile were also down last year--to 2,785 head compared to 4,327 during the previous year.

Hereford (Polled and Horned) continued to be the leading beef breed for the export market. A total of 8,809 head of Hereford were exported in 1970. This was a 32-percent decrease from the previous year's 12,944 head. As in 1969, the majority of Herefords again went to Canada, Mexico, and Chile. Japan took 392 head of horned Herefords and 143 head of Polled Hereford cattle during 1970. Greece, taking a total of 295 head of Herefords in 1970, became a new market for U.S. Hereford breeding cattle.

Angus breeding cattle ranked second in importance as an export breed in 1970, with 3,641 head--a 6-percent increase over the previous year's 3,441 head. Canada and Mexico were the leading Angus-importing countries in 1970. Canada took 1,822 head; Mexico imported 749 head; and Greece, a new market for Angus, imported 437 head. During the last 2 years, the number of Angus cattle exported to Central American countries has been on the increase. During 1970, Costa Rica imported 241 head, El Salvador 50, and Guatemala 68 head. During 1969, Guatemala imported 465 head of Angus breeding cattle.

Brahman cattle ranked third in importance as an export breed with 2,596 head, a decrease of 13 percent from the 1969 total of 2,977 head.

Beef crossbred breeding cattle, mostly females, have become an important export product. In 1970, a total of 2,578 head was exported. Canada was the primary market for these cattle, taking 97 percent of the total. However, during the previous 3 years Venezuela took a total of 8,217 head of crossbred breeding cattle--mostly females with some Brahman blood.

Charolais exports ranked fifth with 1,921 and Santa Gertrudis sixth with 1,303 head.

U.S. beef breeding cattle went to 38 foreign countries during 1970 and came from 44 states. Texas again was first in importance during 1970 as an exporting state with 4,858 head. Montana was second with 3,208 head, South Dakota ranked third with 2,051, North Dakota fourth with 1,485 head, and Florida fifth with 1,410. See Table 4 for details by state of origin and breed.
